

Environmental policy:

Environmental protection as a Corporate goal

- We protect the environment and take measures to avoid or eliminate environmental pollution.

Environmentally friendly production facilities

- We use production techniques that are gentle on the use of resources. While using our production facilities, we pay attention to minimizing environmental impacts.

Sustainable business

- We protect the natural foundations of life, pay attention to the optimal use of resources and care for the environment. We promote resource- and environmentally friendly products and processes.

Compliance with all requirements

- We comply with all legal and official requirements.

Constant improvement of your own organization

- Our goal is to continuously improve our environmental behavior and performance.

Environmental protection as a task for all employees

- Not only those who have special responsibility for environmental protection, but every single employee is committed to environmental protection.
